

This listing of claims will replace all prior versions and listings of claims in the application:

LISTING OF CLAIMS:

1-22 (Canceled).

23. (New) A computer-implemented method for electronically signing an electronic document, the method comprising:

presenting an electronic document to user;

receiving an indication from the user as to whether the user wishes to electronically sign all or part of the electronic document;

if the user wishes to sign all or part of the electronic document, determining which of a plurality of electronic signature services is to be used; and

signing all or part of the electronic document using the determined electronic signature service.

24. (New) The method of claim 23, wherein the electronic signature service to be used is determined based on user information.

25. (New) The method of claim 23, wherein the electronic signature service to be used is determined based on an intended recipient.

26. (New) The method of claim 23, wherein presenting the electronic document to the user further comprises:

presenting the electronic document to the user in a first format;

allowing the user to request presentation of the electronic document in a second format, wherein the second format is determined by an intended recipient of the electronic document after signature.

27. (New) The method of claim 26, wherein presenting the electronic document to the user further comprises:

selecting one or more data elements from the electronic document; and
displaying the one or more selected data elements in the second format to the user.

28. (New) The method of claim 27, wherein the one or more selected data elements are displayed to the user in the second format with additional text.

29. (New) The method of claim 28, wherein the one or more selected data elements comprise contractual terms and the additional text comprises language of a contract.

30. (New) An electronic signature system, the system comprising:

means for presenting an electronic document to user;
means for receiving an indication from the user as to whether the user wishes to electronically sign all or part of the electronic document;
if the user wishes to sign all or part of the electronic document, means for determining which of a plurality of electronic signature services is to be used; and
means for signing all or part of the electronic document using the determined electronic signature service.

31. (New) The system of claim 30, wherein the electronic signature service to be used is determined based on user information.
32. (New) The system of claim 30, wherein the electronic signature service to be used is determined based on an intended recipient.
33. (New) The system of claim 30, wherein the means for presenting the electronic document to the user further comprises:
 - means for presenting the electronic document to the user in a first format;
 - means for allowing the user to request presentation of the electronic document in a second format, wherein the second format is determined by an intended recipient of the electronic document after signature.
34. (New) The system of claim 30, wherein the means for presenting the electronic document to the user further comprises:
 - means for selecting one or more data elements from the electronic document;
 - and
 - means for displaying the one or more selected data elements in the second format to the user.
35. (New) The system of claim 34, wherein the one or more selected data elements are displayed to the user in the second format with additional text.
36. (New) The system of claim 35, wherein the one or more selected data elements comprise contractual terms and the additional text comprises language of a contract.
